Where do you find a high quality commercial grade firewood log splitter built just for you?

Wolfe Ridge Manufacturing does just that, quite possibly the only manufacturing company in the USA that will custom build each machine to your order. We take pride in our work and love to be able to serve our customers with the best Made in the USA log splitters available!

We build large, heavy duty machines customized with the options that you need for your firewood processing operation. We go the extra mile to know that your new log splitter will look great and have a long trouble free life. We utilize high quality components like Honda GX series engines, Prince hydraulics, Eclipse Powder Coating, high strength U.S. Steel to ensure that your new machine will last for decades.

Check out our line-up of solutions to your firewood processing needs. Whether you are a large scale commercial producer that needs to produce 2 full cord per hour or a home owner that would like to spend more time enjoying life, our fire-wood splitters can help!

We do have discounts for our Military Veterans as a thank you for serving our great country! Be sure to ask for this when ordering!

Wolfe Ridge MFG Customer Reviews

Brett Zacho

February 2022

I researched wood splitters for 2 years and narrowed it down to the Wolfe Ridge Pro Series and a Canadian manufacturer as they seemed like the two best producers in the market. I chose Wolfe Ridge not only because they are made in the USA but the splitters are more maneuverable and the wedges are so easy to change. I have had my Wolfe Ridge Pro 28C for 3 months and have split over 14 full cords of wood on it - all in my spare time. I was worried that the 28C wouldn't have enough power but it has split everything I've thrown at it - red oak, white oak, cherry and ash. I love the hydraulic lift, changeable wedges and the electric start.

I truly believe I made the best decision. Yes, it was a lot of money but I feel the value is there and it is worth every penny paid.

Chris and his team are very responsive and create exceptional products!

Robert Allen

July 2022

Picked up my new Wolfe Ridge 35C on 07-30-2022. This unit does not disappoint, superb quality. Splitter out performs any other unit I have owned in the past twenty years. Customer Service is OUTSTANDING, Chris is always available to answer any questions.

Claude Sheldon

January 2022

Just received my compact commercial with magnum package. This splitter is engineered to perfection! It produces split wood with ease. Highly recommended. Great job Chris and crew!

Darin Fronabarger

December 2021

Bought a Wolfe Ridge a few years back and must say that these splitters are "Top Notch"! When the unit arrived, it was wrapped very tightly to protect the paint and components. After pulling all the wrapping off, I didn't even want to use it because of how incredible the finished product was, amazing! I still wash this unit regularly after using it today and spray with Fluid Film when needed. Excellent Products, if not the best! You will not be disappointed!

Rob Cote

December 2021

Got the 28 Pro with 4-way wedge this year. What a terrific machine. Excellent design, and high quality build. I'm splitting big rounds with ease and efficiency. At 60 yrs old, I thought my firewood splitting days might be coming to a close, but with this 28 Pro, there's no end in sight. Thanks Wolfe Ridge for allowing me to continue doing something I love.

Wolfe Ridge MFG Customer Reviews

Brian Frattaroli

June 2022

Just picked up my new Wolfe Ridge 35SHO from Juile at Daum's Fabrication in PA. From the very first phone conversation I had with Juile he was extremely helpful with the 1,000 questions and comparison that I had. I ordinarily was going to buy an Easton made 22-28 splitter but the sales guy was not answering my question. So Juile took almost 30 minutes on the phone explaining everything in great detail to me mad me feel super comfortable making the switch. So I put my order in for the 35 SHO and we were off to the races. A week later called and talk to Juile again and he answered a few more questions that I had after watching 1,000 YouTube videos of every splitter. I also talked to him about a conveyor witch by the end of the phone conversation I also purchased. My conveyor came in 2nd week of May so I took the 3 hour trip up to get it and was still waiting for splitter to arrive with was scheduled for end of May. I probably called Juile 6 to 8 time checking ETA of splitter like a little kid at Christmas and he took my call every time and gave me the best update that was possible. June 2 my machine was in so I took the trip again when I got there he went over every inch of the machine with my to make sure I understood everything I needed to know.

I also want to thank Chris and his crew for an impressive built machine finally getting to see it in person was amazing. This is by far one of the best built piece of equipment were quality is still important on every machine they build. Thank you, Brian

Vernon Etheridge

March 2022

Back in October I emailed u asking how your splitter would work on a compact tractor. My Kioti CK 2610 handles it well. I picked up my SS3030HD in January. Been using it now for about 2 months.

I get my wood from a tree service so a lot of the trees I get are 30 plus diameter rounds. Rounds over 24 inches the 28 pro splitter would bust them fine but they were just to big for me to handle safely by myself. With your SS3030HD on my Kioti CK2610 I'm able to bust big rounds in quarters. Then I finish processing the quarters on the 28 pro. I bought both my splitters from Faith Farm Supply in Salisbury, NC. They are an awesome dealer.

Thanks for making great firewood splitters.

Roger Mellon

March 2022

I have been looking at Wolfe Ridge log splitters for 2 years ever since I had the chance to run one.

Now we are gonna put it to the test! We got ours from Hartville Hardware in Hartville, OH and had a great experience.

Keep up the good work guys!
